PROJECTS

Multi-Armed-Bandit Simulation and ϵ -Greedy Strategy Analysis

<https://github.com/tanveer-akhan/multi-armed-bandit-framework>

- Custom Algorithm Development: Designed and implemented a simulation of the K-Arm Bandit Problem entirely from scratch, establishing a foundational understanding of the Exploration vs. Exploitation trade-off in reinforcement learning.
- Experimental Analysis: Developed, tested, and compared multiple decision-making strategies, including Pure Exploitation, Pure Exploration, and the ϵ -Greedy approach, across hundreds of attempts to evaluate reward optimization.
